

The Blizzard Heat

The latest development by Blizzard Protection Systems Ltd.

The Blizzard Heat has been developed over the last 2 years in collaboration with the US Military.

The requirement for the US Military was; a self heating casualty bag with multiple access points to allow for casualty access without losing heat. It had to be robust and totally weatherproof whilst remaining light and small for transport before use.

The Blizzard heat is CE approved, registered with the FDA and has a NSN number.

Excerpt from: **MILITARY MEDICINE, 172, 11:1, 2007 — Tactical Combat Casualty Care 2007: Evolving Concepts and Battlefield Experience**

**"7. Prevention of hypothermia:
Minimize casualty's exposure to the elements.
Keep protective gear on or with the casualty if feasible
Replace wet clothing with dry if possible.
Apply Ready-Heat blanket to torso
Wrap in Blizzard Rescue Blanket"**

The Blizzard Heat now includes the heating element of the above statement using air activated heat pads.

Used in both Medical and Military organisations; the Blizzard Heat is the preferred choice for many such organisations around the world.

With 4 large air activated heat packs the Blizzard Heat is the ideal solution for the prevention and treatment of hypothermia.

The unique Reflexcell™ material ensures the casualty remains warm and the design of the Blizzard Heat enables casualty access via Velcro openings on both sides and to the front

The specially designed (replaceable) Heat pads start working in around 5 minutes delivering approximately¹ 42°C to the casualty within around 20 minutes of activation and maintains this output for 24 hours¹.

The Heat pads are attached via internal Velcro and can be moved around inside the blanket to concentrate heat

The Reflexcell™ material is both windproof and rainproof and works just as well when wet as it does when dry.

in Togs per kilogramm

***Packed Size:**

Length: 32cm (12¾")

Width: 21cm (8¼")

Thickness: 8cm (3¼")

Weight: 1.5kg (3.3lbs)

***Unpacked Size:**

Length: 2.4m (94½") Width: 2.0m (78¾")

Operating temp: -40°C — +40°C
