PRODUCT REVIEWS FROM STREET CREWS

BASIC FIRST AID teaches us that before immobilizing a joint, we need to secure the bones above and below. The new X-Collar from [Emegear] is designed to immobilize the cervical spine by contracting and anchoring the collar to the occipital and facial bones of the skull, and to the torso at the level of the clavicle and scapula. Deriving its name from the two Velcro® straps that cross under the chin to prevent rotation, this collar offers more than 24 levels of adjustment that can be fitted to a patient in their "position of comfort," even if there's significant lateral rotation. As with any new device, orientation and practice is necessary, but once you use it, the X-Collar is sure to impress.

THE CERVICAL SPLINT

...occur because of movement AFTER initial trauma.

James, Colleen Y., et al. "Comparison of Cervical Spine Motion During Application Among Four Rigid Immobilization Collars." *Journal of Athletic Training* 39-2 (2004): 136-145.

Hildwine, Fran. (2007, October) Hands On: Gen-X Immobilization. Jems. 82.

5 Reasons to use the XCollar Cervical Splint.

SPLINTED STABILITY!

1 Acting as a splint, the XCollar is the ONLY collar that secures the bones above and below the cervical region with its unique back and chest supports.

2 **THE ONLY COLLAR TO PROVIDE TRUE IMMOBILIZATION IN THE NEUTRAL POSITION!**

So flexible it can fit anyone from a small child to a XL adult! One collar covers all 24 sizes! No manipulation necessary!

3 **ADJUSTS DURING APPLICATION.**

Bi-lateral and vertical adjustments replace best-estimate guesses, allowing you to fit the collar directly on the patient!

4 **IMMOBILIZES "IN POSITION!"**

If movement will create pain for your patient, why manipulate at all? The XCollar's EXCLUSIVE dual-sided straps allow you to stabilize in a variety of positions!

5 **SIMPLE AND EFFECTIVE!**

Application and instruction has never been easier with our 4 simple application steps and dedicated training department.

CALL TODAY to see how YOU can improve the quality of life for your post-trauma patients.
