

THE EMERGENCY BANDAGE

Trauma / Wound

Compression Dressing

The Emergency Bandage is the first major innovation of its kind in over 50 years!

- UK NSN # 6510-99-961-3270 - FCP-01 - 4" width
- UK NSN # 6510-99-332-2032 - FCP-02 - 6" width
- US NSN # 6510-01-515-7528 - FCP-05 - 6" + mobile pad

First Care Products offers an innovative, combat proven first-aid device for the staunching of blood flow from traumatic hemorrhagic wounds in pre-hospital emergency situations.

This internationally patented, FDA approved bandage is the ideal solution for emergency treatment, when every second counts. *The product consolidates multiple first-aid devices such as a primary dressing, pressure applicator, secondary dressing and a foolproof closure apparatus to secure the bandage in place, all within one unit.*

The Emergency Bandage is designed for quick and easy application by professional and non-professional caregivers to provide effective, multi-functional treatment.

The Emergency Bandage's sterile, non-adherent pad applies pressure to any site, is easily wrapped, secured and has an additional application, similar to a tourniquet, to further constrict blood-flow. *The product is so easy to use that even an injured person can self-apply the bandage with one hand.*

APPLICATIONS:

- Military - Medics, Soldiers
- First Responders
- Emergency Medical Services
- Law Enforcement
- Disaster Preparedness
- Homeland Security
- Commercial and Industrial Sites
- First-Aid Kits

ADVANTAGES:

- Immediate direct pressure
- Quick and easy self-application
- Consolidation into a single unit: **primary dressing, pressure applicator, secondary dressing, closure bar**
- Significant time, space and cost savings
- X-Ray friendly
- Versatile
- Secure, water-resistant closure bar

The Emergency Bandage is individually packed, double-wrapped. The outer OD green wrapper displays instructions for use.

The inner vacuum-sealed wrapper is water-repellent and reduces weight and volume. The wrapper is sterile and disposable.
